Seamless Rainbow Holographic Film

Capture Attention in Every Angle

Make labels impossible to ignore with Rainbow Holographic Film labelstock. This striking material delivers dynamic color shifts and eye-catching visual depth that instantly elevates product packaging. The seamless holographic finish creates a premium, high-impact appearance that helps brands stand out on crowded retail shelves while adding dimension and excitement to virtually any label design.

Beyond its impressive shelf appeal, this holographic film facestock is paired with an adhesive specifically designed for applications with film facestocks. The result is a label material that combines unforgettable aesthetics with dependable performance. And it's available Precise℠, which is perfect for small run applications.

Rainbow Holographic Film

Dynamic Impact, Outstanding Performance

SFA™ adhesive is a clear, general purpose, emulsion acrylic permanent adhesive specifically designed for applications with film facestocks. It exhibits excellent ultimate adhesion to polyethylene, polypropylene, and glass. It is also well suited for small, cylindrical labeling.

Applications include:

- Health and beauty products
- Craft beer and beverage labeling
- Retail packaging
- Kiddie stickers
- High impact label design
